WORK EXPERIENCE

Product Developer at Catena Media

April 2022 – Present

Building innovative user experiences through research to validate design decisions and identifying new opportunities that result in increased engagement to web components within a portfolio of brands.

Full-Stack Developer at Think Malta

July 2018 – September 2020

Developed back-end solutions whilst working with designers to develop interfaces that are feasible with both the client's expectations and the available modern web technologies. Sketch & InVision was used for prototyping.

Freelance Web Developer

June 2017 – June 2018

Freelancing involved searching and meeting clients, understanding their needs, and delivering the product or service within a reasonable timeframe. It also brought the challenge of building my own personal brand and marketing my services. Services included web design, application development, web hosting and print.

Software Developer at ISB Malta

July – December 2016

ORGANISATIONS

IDF Malta
